

Vyremaid

OSRS Clan Utility Bot — Overview & Command Reference

What is Vyremaid?

Vyremaid is a Discord bot built for Old School RuneScape clans. Members link their Discord account to their in-game RSN once, and the bot keeps a clan role in sync automatically against your Wise Old Man group membership — no manual role management. From there it covers the everyday utility work a clan actually needs: live hiscores and skill lookups, boss kill counts, a money-making guide filtered to what each member personally qualifies for, Grand Exchange prices and loot-split calculations, Skill/Boss of the Week tracking, clan-wide XP leaderboards, and live trackers for shooting stars and Tears of Guthix worlds. Every command works as both a classic **!command** and a modern **/command** with Discord's own autocomplete.

Initial Setup

Do this once, in order, when the bot first joins your server:

- 1 **Invite the bot** using an OAuth2 URL with scope **bot** and these permissions ticked: **Send Messages, Embed Links, Read Message History, Manage Roles**.
- 2 **Position the bot's role** above any role you want it to manage — Server Settings → Roles → drag the bot's own role higher than your clan role. (Discord blocks bots from assigning/removing roles ranked above their own.)
- 3 Run **!setgroup <your Wise Old Man group link>** — links this server to your clan's WOM group. Powers **!sotw** auto-detection, **!top**, and role sync.
- 4 Create (or pick) a role for clan members, then run **!setclanrole @YourRole** — the bot will auto-assign/remove this role based on WOM group membership.
- 5 Have members run **!setusername <their RSN>** — this saves their account and immediately checks/applies the clan role if steps 3–4 are set up. An admin can run **!setuser @member <rsn>** on someone's behalf if they haven't done it themselves.
- 6 Optionally run **!syncroles** once to backfill roles for anyone who set their RSN before setup was finished.
- 7 Optionally run **!addbotchannel #channel** to restrict everyday commands to specific channels. This is opt-in — skip it and every command works anywhere.

That's it — everything else works automatically from there (role sync re-checks every 30 minutes).

Channel restriction: if **!addbotchannel** is set, using a restricted command in the wrong channel deletes the offending message and posts a short-lived reminder pointing at the right channel.

Slash commands: every command below also works as **/command** — Discord's own autocomplete shows descriptions and options as you type **/**. A few (**/mmg**, **/whois**, **/skill**, **/setverification**) have cleaner slash-only versions with proper dropdowns/pickers instead of the combined-text style the **!** version uses.

Account Linking

Command	Permission	Description
<code>!setusername <rsn></code>	Everyone	Save your default RSN for other commands. <code>/setusername</code> works in any channel and replies privately.
<code>!rsn</code>	Everyone	Show your currently saved RSN.
<code>!whois @member / <rsn></code>	Everyone	Look up the Discord↔RSN link either direction.
<code>!setuser @member <rsn></code>	Manage Server	Set another member's RSN for them, e.g. if they haven't run <code>/setusername</code> themselves.

Hiscores & Stats

Command	Permission	Description
<code>!hiscores [rsn]</code>	Everyone	Full skill table + total level/XP/rank.
<code>!<skillname> [rsn] [period]</code>	Everyone	Single-skill lookup, e.g. <code>!agility</code> , <code>!slayer</code> . Works for all 24 skills, plus common shorthands like <code>!str</code> , <code>!att</code> , <code>!agi</code> , <code>!hp</code> , <code>!rc</code> (shorthands are ! only — use <code>/skill</code> for a slash-friendly dropdown version). Add a period (1d/1w/1m/1y) at the end, e.g. <code>!slayer DragonForce 1w</code> , to show XP/levels gained over that period via Wise Old Man instead of totals.
<code>!profile [rsn]</code>	Everyone	Combined card: levels + Wise Old Man EHP/EHB/Time to Max.
<code>!1d / !1w / !1m / !1y [rsn]</code>	Everyone	Total XP/levels gained over that period, all skills combined (via Wise Old Man) — the all-skills version of <code>!<skillname> [period]</code> .
<code>!kc <boss> [rsn]</code>	Everyone	Boss/activity kill count or score, e.g. <code>!kc yama</code> , <code>!kc cox</code> , <code>!kc jad</code> .
<code>!record <skill> [rsn] [period]</code>	Everyone	Wise Old Man personal-best XP gain for a skill in a single period (default 1w), e.g. <code>!record rc 1w</code> . Different from <code>!<skillname> [period]</code> , which shows current gains, not the best-ever.
<code>!strategy <boss></code>	Everyone	Gear + inventory setup image for a boss fight, e.g. <code>!strategy vorkath</code> . Dropdown to switch setups if more than one exists.
<code>!tiles <content></code>	Everyone	Ground marker tile import for a boss/activity, e.g. <code>!tiles zilyana</code> , <code>!tiles sire</code> . Sent as a file — import via the world map button in RuneLite.

Item Prices & Wiki

Command	Permission	Description
<code>!price <item></code>	Everyone	Current Grand Exchange buy/sell price, e.g. <code>!price twisted bow</code> .
<code>!split <item> <people></code>	Everyone	Splits an item's GE value between a number of people, e.g. <code>!split twisted bow 5</code> .
<code>!wiki <topic></code>	Everyone	Quick link to the most relevant OSRS Wiki page.

Shooting Stars

Command	Permission	Description
<code>!stars</code>	Everyone	Top 2 tiers of active shooting stars you can mine (by saved RSN), hiding anything over 20m old.
<code>!stars >t6</code>	Everyone	Shows all active stars above tier 6 regardless of level (also supports <code><</code> , <code><=</code> , <code>>=</code> , <code>=</code>).
<code>!stars <rsn></code>	Everyone	Filters by a different account's Mining level instead of your own, e.g. to check an alt.

Tears of Guthix

Command	Permission	Description
<code>!tog [count]</code>	Everyone	Top worlds by community-confirmed stream order (default: top 5).

Money Making Guide

Command	Permission	Description
<code>!mmg [category] [rsn]</code>	Everyone	Methods you qualify for. Categories: combat, skilling, processing, collecting, farming. <code>/mmg</code> has a proper category dropdown.

Clan Competitions

Command	Permission	Description
<code>!sotw</code>	Everyone	Current Skill/Boss of the Week leaderboard.

Leaderboards

Command	Permission	Description
<code>!top [period]</code>	Everyone	Top XP earners (whole clan) + top level gainers (linked members). Periods: 1d, 1w, 1m, 1y.

Auto-Responses

Command	Permission	Description
<code>!listtriggers</code>	Everyone	Show every trigger word configured for this server.
<code>!addtrigger <word> <response></code>	Manage Server	Whenever anyone says <word>, the bot replies with <response>.
<code>!removetrigger <word></code>	Manage Server	Removes a previously added trigger.

Server Setup

Command	Permission	Description
<code>!setgroup <link></code>	Manage Server	Link this server to a Wise Old Man group.
<code>!cleargroup</code>	Manage Server	Unlink this server from its Wise Old Man group.
<code>!setclanrole @Role</code>	Manage Server	Auto-assign/remove this role based on WOM group membership.
<code>!syncroles</code>	Manage Server	Manually re-check every linked member's clan role now.
<code>!setsotw <link></code>	Manage Server	Manually override which competition !sotw shows.
<code>!addbotchannel #channel</code>	Manage Server	Approve another channel for everyday commands (can be run more than once).
<code>!removebotchannel #channel</code>	Manage Server	Remove a channel from the approved list.
<code>!listbotchannels</code>	Everyone	Show which channels are currently approved.
<code>!setwelcomemessage <text></code>	Manage Server	DM new members this on join. Supports {member}, {name}, {server}.
<code>!removewelcomemessage</code>	Manage Server	Stop sending a join DM.
<code>!testwelcomemessage</code>	Manage Server	Sends you the join DM right now, to preview it without a second account.

Command	Permission	Description
<code>/setverification</code>	Manage Server	Set this server's WOM group verification code, via a private pop-up form (slash only).
<code>!updatewom</code>	Manage Server	Ask WOM to refresh anyone whose stats are 24h+ stale (also runs automatically daily).

Misc

Command	Permission	Description
<code>!ping</code>	Everyone	Health check — replies "pong" if the bot is online.
<code>!help</code>	Everyone	Lists everyday commands anyone can use — safe to pin, doesn't include admin-only commands.
<code>!adminhelp</code>	Everyone	Lists server management commands (everything requiring Manage Server) separately from !help.

This guide is generated from the bot's own command list — see `COMMANDS.md` in the project folder, or re-run `generate_commands_pdf.py` after commands change.
